Problem / Feature / Benefit Framework: NFP Organizations

| Problem | Feature* | Benefit |
|--|--|--|
| Not-for-Profit organizations are required to report their financial position, activities, and cash flows per standards of the Financial Accounting Standards Board SFAS No. 117. | <ul style="list-style-type: none"> • Data dimensions enable separate reporting of programs, support types, and grants. • Flexible financial reporting allows for the presentation of net assets per SFAS 117. | <ul style="list-style-type: none"> • Process: Elimination of “export to Excel” financial reporting and rework for auditors. • ROI: Staff hour reduction for board and/or auditor review and less reporting errors. |
| Costs must be segregated according to program, grant and support type, subject to manager approval, and regularly reported on for planned (budget) vs. actual variances. | <ul style="list-style-type: none"> • Configuration of expense and purchase requests permit specific program approval. • Report permissioning grants program level budget vs. actual reports for managers. | <ul style="list-style-type: none"> • Process: Elimination of manual approval processes and program budget reporting. • ROI: Less time devoted to expense administration, approval, and documentation. |
| Many NFPs require separate revenue management related to events, contributions, and pledges; without standard processes for their administration reporting errors are likely. | <ul style="list-style-type: none"> • Custom Account Labels provide guardrails for the correct posting of multiple revenues. • Data dimensions allow the segregation of donations according to related restriction. | <ul style="list-style-type: none"> • Process: Preset revenue management approach for all applicable support types. • ROI: Increased reporting transparency and reduction of revenue posting errors. |

*Features understood as both software related (in the feature set of our platforms) and custom configuration per the NDH Group.
